# REVOLUTIONIZING DATA SECURITY AND COMPLIANCE

Explore the transformational journey of a leading cloud-based SaaS company specializing in employee assessment tools. In this case study, we unveil the challenges faced by our clients as they scale, highlighting the critical need for a robust and scalable security infrastructure to safeguard sensitive employee data and maintain market trust.

THE CHALLENGE

Our dynamic client, specializing in employee assessment tools, grappled with the demands of a growing user base, increasing data volume, and the complexities of the ever-changing regulatory environment. Struggling with stretched internal resources, the company faced the urgent need for a comprehensive, continuous compliance program to ensure data security, client trust, and sustained market success.

THE SOLUTION

With approximately 100 employees and certifications in SOC 2 Type 2 and ISO 27001, our client exemplifies commitment to high standards. GMI, a longstanding partner, introduced a comprehensive "Managed Compliance Department" solution to address their evolving needs:

Governance and Oversight:

GMI assumed roles in Information Security Program governance and oversight, ensuring a top-tier security posture.

Information Security Program Support:

Our team supports and enhances the client's information security program, adapting to changing threats and technologies.

Policy and Process Maintenance:

We maintain and oversee policies, processes, and control techniques, aligning them with the latest information security requirements.

Risk Mitigation:

Collaborating closely with the client's staff, we actively mitigate risks to their technical, operational, and administrative security controls.

Process Documentation Maturation:

Our experts mature process documentation, streamlining and optimizing security operations.

ISO 27001 Scope Consultation:

GMI consults on optimizing the efficiency of the client's ISO 27001 compliance program, ensuring it is both comprehensive and cost-effective.

GRC Platform Implementation and Support:

We implement and support Governance, Risk Management, and Compliance (GRC) platforms, fortifying the client's compliance infrastructure.

Annual Security Assessments:

Conducting annual penetration tests, incident response exercises, risk assessments, and internal audits, verified by Insight Assurance.

THE OUTCOME

GMI's customized Managed Compliance Department solution has revolutionized how this SaaS company approaches security and compliance. Our holistic, proactive approach not only ensures continuous adherence to industry standards but also positions the client as a leader in data security and regulatory compliance within the competitive SaaS market.
